

§ 92.515

scheduled to commence within 14 days of receipt of the request for a hearing.

§ 92.515 Hearing procedures.

The procedures provided in § 86.1014-84(i) through (s) of this chapter apply for hearings requested pursuant to § 92.513 regarding suspension, revocation, or voiding of a certificate of conformity.

§ 92.516 Appeal of hearing decision.

The procedures provided in § 86.1014-84(t) through (aa) of this chapter apply for appeals filed with respect to hearings held pursuant to § 92.515.

§ 92.517 Treatment of confidential information.

Except for information required by § 92.508(e)(2) and quarterly emission test results described in § 92.508(e), information submitted pursuant to this subpart shall be made available to the public by EPA notwithstanding any claim of confidentiality made by the submitter. The provisions for treatment of confidential information described in § 92.4 apply to the information required by § 92.508(e)(2) and all other information submitted pursuant to this subpart.

Subpart G—In-Use Testing Program

§ 92.601 Applicability.

The requirements of this subpart are applicable to all manufacturers and remanufacturers of locomotives subject to the provisions of subpart A of this part, including all locomotives powered by any locomotive engines subject to the provisions of subpart A of this part.

§ 92.602 Definitions.

Except as otherwise provided, the definitions in subpart A of this part apply to this subpart.

§ 92.603 General provisions.

(a) EPA shall annually identify engine families and configurations within families on which the manufacturer or remanufacturer must conduct in-use emissions testing pursuant to the requirements of this section.

40 CFR Ch. I (7–1–04 Edition)

(1) Manufacturers and remanufacturers shall test one locomotive engine family each year for which it has received a certificate of conformity from EPA. Where a manufacturer holds certificates of conformity for both freshly manufactured and remanufactured locomotive engine families, the Administrator may require the manufacturer to test one freshly manufactured engine family and one remanufactured engine family. The Administrator may require a manufacturer or remanufacturer to test additional engine families if he/she has reason to believe that locomotives in an engine family do not comply with emission standards in use.

(2) For engine families of less than 10 locomotives per year, no in-use testing will be required, unless the Administrator has reason to believe that those engine families are not complying with the applicable emission standards in use.

(b) Locomotive manufacturers or remanufacturers shall perform emission testing of a sample of in-use locomotives from an engine family, as specified in § 92.605. Manufacturers or remanufacturers shall submit data from this in-use testing to EPA. EPA will use these data, and any other data available to EPA, to determine the compliance status of classes of locomotives, including for purposes of subpart H of this part, and whether remedial action is appropriate.

§ 92.604 In-use test procedure.

(a) Testing conducted under this subpart shall be conducted on locomotives; testing under this subpart shall not be conducted using an engine that is not installed in a locomotive at the time of testing.

(b) Locomotives tested under this subpart shall be tested using the locomotive test procedures outlined in subpart B of this part, except as provided in this section.

(c) The test procedures used for in-use testing shall be consistent with the test procedures used for certification, except for cases in which certification testing was not conducted with locomotive, but with a development engine, or other engine. In such cases, the Administrator shall require deviations from the certification test procedures
